

Do you want to learn how managing rain water on your property can help protect lakes?

Come Learn about how Do-It-Yourself Runoff Solutions and Vegetation Management can have a Positive Effect on Waterbodies by Reducing Rain Water Runoff and Erosion

## STORMWATER SOLUTIONS WORKSHOP

August 21<sup>st</sup>, 2019

Deerfield Town Hall

Church St., Deerfield, NH

6:30PM-8:30PM

### Program:

- **Introductions & Water Quality Issues at Pleasant Lake: PLPA**
- **Soak Up the Rain, Lisa Loosigian (NH DES)**
  - Throughout New Hampshire, neighbors are planting rain gardens and trees, using rain barrels and dry wells, and finding lots of other ways to Soak Up the Rain to protect the water in their local lakes and rivers. Come learn how we can each do our part at home to reduce water pollution in our lovely NH lakes and rivers.
- **NH Lakes' Shores, Jason Aube (NH DES)**
  - Jason will provide a presentation on the importance of retaining vegetation along the shoreline. He will also discuss the limitations on vegetation removal and what activities require a *NHDES Shoreland Permit*.
- **Questions & Answer Session and Wrap Up**

This workshop is possible because of the NH State Conservation Committee (SCC) Moose Plate Grant through the *Pleasant Lake's Restoring Pleasant Lake: A Stormwater Education and Improvement Project*
